NEW TREND IN EXAMINING RARE COINS

If you have recently attended rare coin auction sales, you may have observed that the latest trend in examining rare coins is in a darkly lit room and a powerful single source of lighting. The purpose behind this type of viewing is rather simple. By eliminating outside light sources and allowing a single powerful light source to provide the lighting, we find that glare is no longer a problem and the coin can be maneuvered to provide more controlled visibility.

The interesting feature here is that this manner of viewing coins is being utilized by several of the major grading laboratories and thus by utilizing the same principle, one is more likely to be able to examine a coin and better ascertain how the coin will be graded if sent in for a certificate.

We are pleased to announce that Superior Stamp & Coin is distributing both the light source and the magnifier which are being used to grade coins by some of these grading laboratories. It has been no secret within the trade that our line of halogen lights and magnifiers have been great sellers. We are pleased to provide this listing of our more popular products. We have placed an asterisk beside the two items being used by these laboratories. All represent great quality and will serve you for many years.

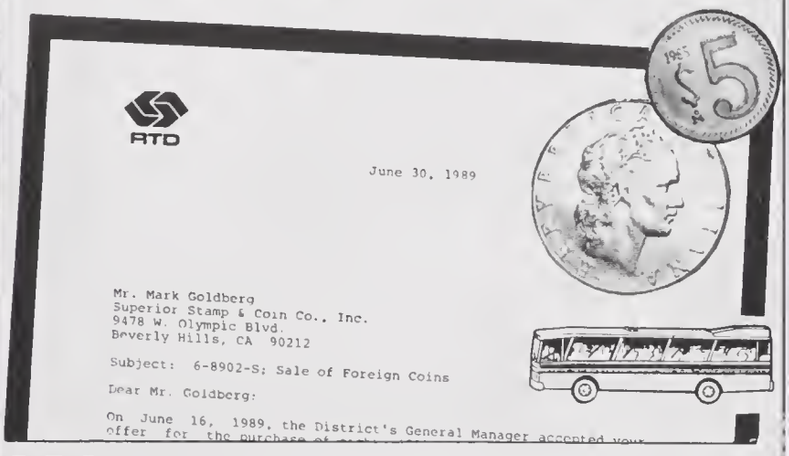
SUPERIOR BUYS TONS OF FOREIGN COINAGE FROM LOCAL SOUTHERN CALIFORNIA BUS COMPANY



RTD

June 30, 1989

Mr. Mark Goldberg
Superior Stamp & Coin Co., Inc.
9478 W. Olympic Blvd.
Beverly Hills, CA 90212

Subject: 6-8902-S; Sale of Foreign Coins

Dear Mr. Goldberg:

On June 16, 1989, the District's General Manager accepted your offer for the purchase of

We are passing on to our readers our good fortune in being awarded our bid to acquire literally tons of foreign coins which the good citizens of Southern California have dropped into the fare boxes of the thousands of busses that cruise this area. It literally took several trips for us to haul our successful bid back to our store and we want to move this massive group just as fast as possible. So let's get the price down and move it out. We took a sample look at one of these 50 pound bags and found a considerable amount of European coinage which has substantial face value. It is interesting to note that we found very little copper coinage among this group. There is a wide assortment of coinage from all over the world and we think that you will agree that these unsearched bags will at least provide you with some real enjoyment. Naturally we will not accept returns since we would never be able to know what was originally contained. We have decided to chop our price to a record low amount just to move them out.

1963 FRANKLIN HALF DOLLARS

We don't have a crystal ball but we believe these coins have a rosy future. Struck at the Philadelphia mint in 1963, these were the last coins in the Franklin series which spans 42 years and has been obsolete for 27. With 1990 Redbook prices at $8.00 each in MS63, we think you'll find this special absolutely irresistible.

SHARE IN THE TRADITION

THE OFFICIAL 1989 GEORGE BUSH INAUGURAL MEDAL

YOU CAN OWN A PIECE OF HISTORY

It's a noble American tradition. Every four years, voters from all over the United States celebrate their cherished freedom by casting a ballot in the presidential election — selecting one man to occupy the highest office in the land. On January 20th, 1989, George Bush — the popular choice of the 1988 election — will take the Oath of Office in Washington, D.C. and be sworn in as the 41st President of our country.

Now, you can share in the heritage and tradition of this important event with the Official 1989 George Bush Inaugural Medals, struck in gold, silver, and bronze.

PERSONALLY APPROVED

These coveted medals are the only officially authorized medals to be created for the occasion. The design has been approved by George Bush and by the Inaugural Medal Committee chaired by Senator Mark Hatfield, and endorsed by the American BiCentennial Presidential Inaugural Committee.

Each of these Inaugural medals will feature the official Inaugural portrait of George Bush, designed by the celebrated American sculptor Mico Kaufman. This is the fourth Inaugural medal produced by Mr. Kaufman, and is his best — a stunning and innovative work of art. The reverse is also an original design by Mr. Kaufman, featuring the 19½-foot high statue of "Freedom," which stands atop the United States Capitol Building.

Furthermore, these medals are superb examples of the minter's art. Each medal is being struck by the Medallic Art Company, a firm which has a history of producing Inaugural medals since 1925.

POPULAR AND HISTORIC

Modern Inaugural medals have become a highly collected series. Interest in them has skyrocketed in recent years, and past issues are eagerly pursued by collectors and dealers. Because of their historical importance and superb artistry, many of these medals occupy places of honor in the collections of our country's most discriminating numismatists.

SPECIAL OPPORTUNITY

The Official 1989 George Bush Inaugural Medals are a special opportunity for Americans to possess a "piece of history." It is a rare chance to own a limited edition collector's item that has been personally approved by the President, marks an event of great significance in the life of our nation, and is the classic work of a famous sculptor. These are medals that you will be proud to own — and proud to pass on to future generations.

DON'T BE DISAPPOINTED!

As you can imagine, production of these important Inaugural Medals is strictly limited, and only a small number of Americans will ever have the privilege of owning one. In 1985, for example, the complete Collector's Set sold out very quickly, and many were disappointed. Since all orders will be shipped based on the date of receipt of your order, we urge you to act quickly.

Please complete and return the enclosed order form today to insure that you can share in the tradition of these historic American Inaugural Medals.

200 YEARS OF TRADITION

The tradition of producing souvenirs to mark inaugurations began in 1789 with our first President, George Washington.

Washington ordered special engraved gilt buttons — featuring the Arms of the United States — which he used to adorn his brown inaugural coat. Word of this quickly spread, and by the time the Inauguration took place, others at the event had special buttons of various designs on their coats to commemorate the occasion. Thus, beginning with the first inauguration on April 30, 1789, Americans displayed their desire to own tokens of these historic events.

In 1901, the first official medal was struck for the Inauguration of William McKinley. Theodore Roosevelt chose Augustus Saint-Gaudens, the famed sculptor, to design his medal, and began the practice of selecting America's foremost artists to create these medals.

The 1989 Mico Kaufman-designed Inaugural Medal continues this proud practice. His stylish creation is the perfect medal to mark the 200th anniversary of an American tradition that allows you to hold art and history in your hand.

ABOUT THE SCULPTOR

Mico Kaufman, whose designs for the 1989 George Bush Inaugural Medal were approved by the American Bicentennial Presidential Inaugural Committee, was chosen Sculptor of the Year by the American Numismatic Society in 1978. He has designed several previous Inaugural Medals, including the 1973 Gerald Ford Vice Presidential medal, the 1974 Gerald Ford Presidential medal, and the 1985 Reagan-Bush Inaugural Medal. Kaufman studied Art at the Academy of Fine Arts in Rome and Florence, Italy, and his works have frequently been displayed in New England, where he makes his home. The stunning Inaugural portrait of George Bush marks another high point in Mr. Kaufman's long and illustrious career.

1964 TOKYO OYLMPIC LABELS

Collection of 6 sheets of 20 stamps all with the same designs but printed in salmon, blue, yellow, violet, green and orange.

These sheets are quite scarce as they were never actually issued. After they were printed the Japanese Government decided that since the designer wasn't Japanese (he was an American) it wouldn't look right for these to be official labels. The contract therefore got cancelled.

These sheets are quite attractive. We feel you can't help but like them

U.S. POSTAL STATIONERY

Not only is this the largest listing we have ever made, it is the best one ever in terms of quality and selection. We have pulled out all stops to offer you, our readers, the opportunity to add auction quality items to your collection. Some items, due to age and the ravages of time may not be equal in quality to others but you will be shocked at how well these envelopes have survived overall. (We should only do as well.) Many items are one-of-a-kind or in limited supply. We recommend a list of alternates be sent with your order.

THE PRUTOT OF PONTIUS PILATE

Photo Enlarged

Pontius Pilate, procurator of Judaea, placed there by the Roman emperor Tiberius, is known to all for his delivery of Jesus to the crucifixion, April 17, A.D. 30:

- Matthew 27:14 - When Pilate saw that he could not prevail, but rather a tumult was made, he took water and washed his hands before the multitudes saying, I am innocent of the blood of this person: see ye to it.

A further reference to Pontius Pilate is also found:

- John 18:28, 19:42 - Pilate then went out into them, and said, What accusation bring ye against this man?....etc.

Coined in A.D. 30-31, each Pontius Pilate prutah we offer exhibits an augur's wand (appears as an upside-down umbrella handle), the famous telltale device which is totally unique to this coinage. This curious looking device relates to Pilate's position as an ardent believer in augury.

This type coin which was in daily use must have truly angered the Children of Israel. Ever since the time of Moses, Jews were taught the evils of divining or augury in any form.

Judaea Bronze Prutot of Pontius Pilate (Procurator under Tiberius), coined A.D. 30-31

Obverse:
Augur's wand encircled by the name Tiberius (nearly always illegible).

Reverse:
The date of Tiberius' reign within a wreath.

Condition:
Fine, with the augur's wand clearly discernible.

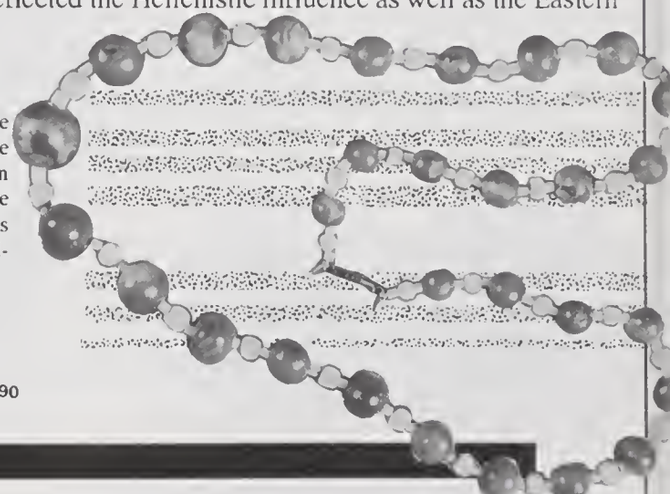
ROMAN AGATE & FAIENCE NECKLACE

In the second millenium B.C. the Romans emerged from a small settlement near Rome and began a course of expansion that was to make them the dominant power in the Mediterranean. By the First Century A.D. Roman territories extended from Britain in the North to Egypt in the South.

Much of the Roman culture and crafts reflected the preceding Hellenistic Period; however, their extensive trade network provided them with a great variety of materials. Artisans often combined styles and materials creating their own unique designs.

While personal adornment was frowned upon by the early Romans, their attitude of austerity had diminished by the First Century B.C. and a rich variety of jewelry abounded. Roman jewelry reflected the Hellenistic influence as well as the Eastern taste for colored stones.



The beads on this Roman necklace are of agate and faience and were made during the Roman Period in Egypt (30 B.C.–A.D. 300). The necklace is approximately 22 inches long, has been restrung with a modern clasp, and is wearable.

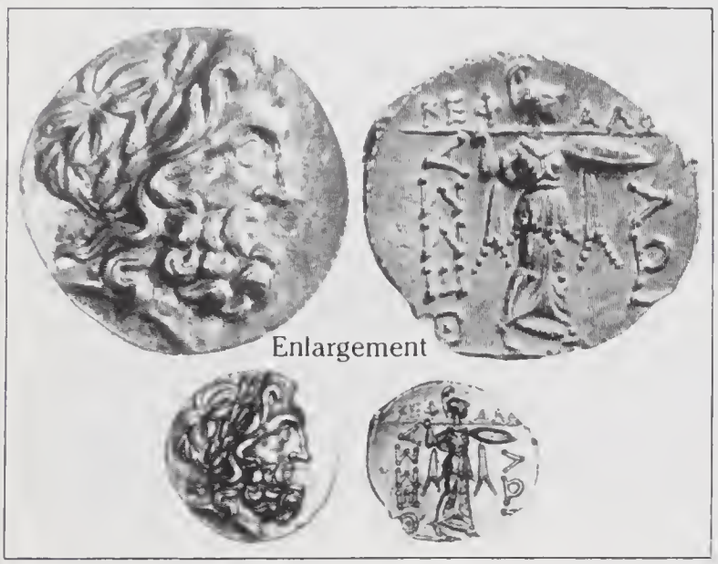
ANCIENT SILVER COINS of THESSALY



Thessaly, Thessalian League - 196 - 146 B.C. Silver Double Victoriatus. Head of Zeus right, crowned with oak. Reverse: Athena Itonia advancing right, brandishing spear and holding shield.

Type of Sear, Greek Coins and their Values, # 2232.

After the great victory of the Roman general, Flamininus, over the Macedonians in 197 B.C., the freedom of the Grecks was proclaimed. Ever since Philip II, Alexander the Great's father, defeated the Greeks in 338 B.C. the city-states in mainland Greece had the heavy foot of the Macedonian Kingdom on their neck. So when the Greeks found themselves once more master of their own destiny in 197 B.C. many of the freed city-states formed economic leagues to facilitate trade and commerce.

The Greek city-states on the eastern half of Central Greece formed a league called the Thessalian League named after the geographical area Thessaly, in which these city-states were located.

This league issued silver coins called the Double Victoriatus. These silver coins proclaim the freedom and self determination of the Greeks after 140 years of harsh Macedonian domination. These coins portray on the obverse, Zeus, the mighty king of the Greek gods while the reverse portrays the goddess Athena, a favorite with the ancient Greeks, in a fighting attitude. Perhaps this symbolizes the Greek determination to fight and defend their newly won liberty.

This great coinage comes to an end after 50 years when the Romans become conquerors in 146 B.C. and thus the new province of Greece was added to the future Roman Empire.

SPECIAL:
We offer the Silver Double Victoriatus in Extremely Fine condition for only $225 each.

SILVER DENARII OF JULIUS CAESAR

Julius Caesar, d. 44 B.C. Silver Denarius minted 47-46 B.C. in Africa by Caesar. Diademed head of Venus, right. Rev.: Aeneas advancing left, carrying Anchises and palladium. Syd.-1013; Crawford-458/1.

Choice VF condition, specially priced at $275.00.

Order No. 01-102

Minted by the first of "The Twelve Caesars," these silver denarii form one of the most historically important coin types of the fascinating Imperatorial period. The obverse type chosen, that of Venus (Victrix), probably refers to Caesar's earlier victory at Pharsalus ("Venus, Caesar" were the watch words/cries for the important battle at Pharsalus), whereas the coins themselves were struck for Caesar's campaign in Africa. The reverse type alludes to the pretended ancestor of Julius Caesar, Iulus, the son of Aeneas. Aeneas, himself the supposed son of Venus and Anchises, bore on his shoulders and thus rescued his father, eventually liberating his family by his actions. Shortly after these coins were struck, Caesar returned to Rome, the master of the Roman world.

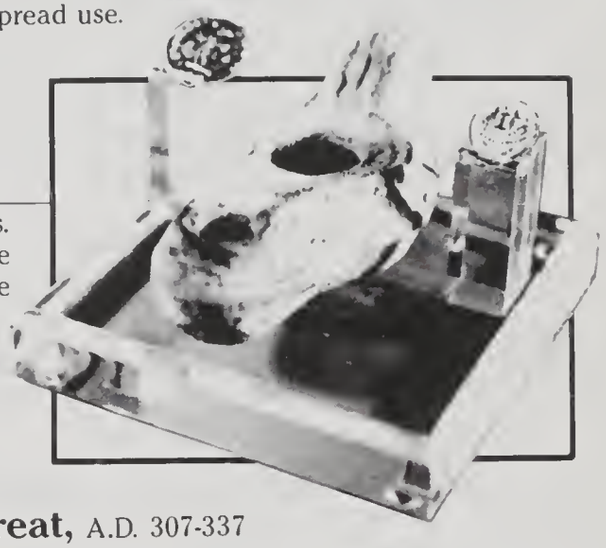
Artifacts of the Holy Land

This set consists of a genuine ancient Judaean Oil Lamp, the type used by the Israelites and early Christians. The oil lamp is flanked by two of the most famous coins in history.

The "Widow's Mite"

And Jesus sat over against the treasury, and behold how many people cast money into the treasury; and many that were rich cast in much. And there came a certain poor widow, and she threw in two mites... And he called unto him his disciples and saith unto them...that this poor widow hath cast more in than all they which have cast into the treasury. Mark 12:14-43

The "Widow's Mite" coins are in average Fair condition. A fitting representative of their widespread use.



Judaean Oil Lamp

The oil lamp is simply superb! Completely intact, free of chips and breaks. These were found in the Judaean Hills outside of Jerusalem (in the same area that the Dead Sea Scrolls were found). In fact, if you pour in some oil, place in a wick, they will throw off light like they did years ago!

Rhodes was at the peak of its power during the period 307-167 B.C., when these coins were minted. It withstood a siege by Demetrios Poliorcetes in 304 B.C. and remained a commercial and military power until 167 B.C., when Rome declared Delos a free port.

Rhodes was also the site of one of the Seven Wonders of the Ancient World; **the Colossus of Rhodes.** The Colossus was a large bronze statue of Helios, (said to be over 100 feet tall), built by Chares of Lindos. The Colossus stood for over fifty years until it was demolished by an earthquake in 224 B.C.

These coins show on their obverse the facing head of Helios and on their reverse a rose and bud, which is a punning allusion to the name of the city and island.

These lovely silver didrachms are superb, boldly struck and grade Lustrous Extremely Fine. They typically sell at retail and at auction for $650.00 or more because coins with facing heads are among the most desirable of all ancient coins.

SILVER TETRADRACHMS MINTED IN THE HOLY LAND

Didius Julianus Buys Roman Empire At Auction!
Roman World Ruled By A Woman!
Aged Military Emperor Dies At York!
Christians Continue To Be Persecuted!
Caracalla Murders Own Brother!

Thus the A.D. late 2nd - early 3rd century headlines would have read, if there had been newspapers and enough educated people to read them. These coins do bear mute testimony to these and other events which shaped and shook the Roman empire during these difficult times. Our coins are virtually Mint State silver tetradrachms minted in the Holy Land and surrounding territories. Reminiscent of earlier Phoenician shekels, they boldly portray the emperor's portrait on the obverse and a majestic eagle on the reverse.

These thick, large coins had tremendous buying power in ancient times, much different than our near-worthless coins jingling in our pockets today. More like hundred-dollar bills, these coins were treasured and dreamt about 1800 years ago as they are today by those fortunate enough to possess one. Part of a relatively small hoard recently unearthed in the Middle East, they represent "the pick of the lot," being lustrous and virtually in mint condition. It is quite possible that these coins were part of a group minted to pay troops, as during the Severan dynasty there was much fortification and strengthening of military might at the frontiers.

Selected silver tetradrachms, subject to limited availability, minted during the Severan Dynasty in virtually Mint State condition are proudly offered at the following prices:

The Ottoman Empire

The Terror of Christian Europe and the Empire that Helped Forge the Events of Modern History

The beginnings of the Ottoman are shrouded in legend and few historical facts are known about them before A.D. 1300. The descendants of the Empire of the Ottomans most probably were Nomadic people from Central Asia who were pushed into Asia Minor by other Nomadic tribes. From the very beginning they were at odds with the Byzantine Empire, the direct decendants of the Roman Empire of Caesar and Constantine the Great. This conflict finally culminated in the famous siege and sack of the Byzantine capital of Constantinople by Mehmed II, full development of the Renaissance in 15th Century Europe for many scholars, and ideas hidden in the East now found refuge and fertile ground in Europe to further develop and grow.

By the middle of the 16th century the Mediterranean Sea almost became an Ottoman lake, with just the areas covered by present day Spain, France, and Italy not being under Ottoman control. To help keep their foes at bay the Ottomans created an an elite military force called the Janissaries, made up of the children of the subject Christian population from the Balkans, brought up as Muslims, and trained as ferocious and invincible soldiers.

With such invincible foes as the Ottomans, the Europeans had to look for alternate routes to the East. This spurred the Portuguese explorers to find a sea route to India and the Orient, which opened up the Age of Discovery in Europe and the landing in the New World by Christopher Columbus.

The famous siege of Vienna in A.D. 1683, when the Ottomans were repulsed, proved to be the turning point in Ottoman history. For the next 200 years the Ottoman Empire suffered a slow decline but nonetheless played an important role in the political and military treaties and power struggles of Europe and the Middle East. The end of the once all-powerful Ottoman Empire, now called the "Sick Man of Europe," came after the close of World War I.

It should be noted that it was during the Ottoman rule that the roots of the foundation of the modern state of Israel came into play with religious tolerance being practiced by Ottomans. When the British captured Jerusalem in A.D. 1917, the Zionist movement was well under way.

We are pleased to offer golden treasures from this turbulent period. Each treasure is a gold Dinar minted by the Ottoman sultan during the 18th Century. None of these coins have images on them as it would have been sacrilegious. The Koran teaching specifically made this point. Thus, the Muslims, on their coins, developed the art of calligraphy to the height of perfection.

Each gold coin has on it the tughra, or royal monogram of the ruling Ottoman sultan. This tughra is similar to many monograms seen on Scandinavian coins. The Ottoman tughra usually contains the title "Khan" (lord), the sultan's father's name, and the epithet, "El Muzaffer Daima" (the Ever Victorious). In addition, each coin has inscribed on it in Arabic the mint of manufacture, usually Istanbul or Cairo, and the reigning sultan's accession date.

These beautiful coins are lustrous and are as struck over 200 years ago

Greek Silver OF THRACE

Struck at one of the most important cities of **Southern Thrace**, these lovely silver coins are beautiful examples of the celator's art. Popular with collectors, they portray the forepart of a horse on the obverse. Grapes are shown on the reverse, as Maroneia was a city significant to the production of wine. Many of the vessels we see as antiquities or as pictured on ancient coinage were used in the serving, mixing or drinking of wine. The strong wine of Maroneia was said to have been capable of being diluted by up to twenty times the quantity of unmixed wine with water.

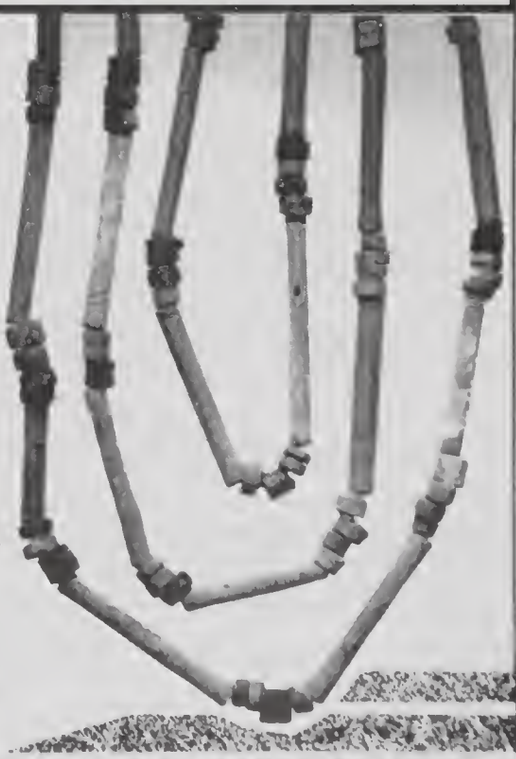
When these coins were current, more and more cities (Municipali) were attaining greater individualistic and political strength, especially those of **Milan, Pavia** and **Lucca** in the North. As an aside, it was Pavia (in Roman times, Ticinum) that was the principal Italian mint of Charlemagne's Carolingian Empire. Along with the rise of the Italian city-state, this was a time of the maturation of the Italian language and its many dialects. In fact, there are no known written examples of Italian as a language before the 13th century. It was an era of the romantic Chanson's (Franco-Italian songs as well as poems), of Saint Francis of Assisi. (1181/2 - 1226) and later of Dante Alighieri (1265-1321).

The coins are slightly cup-shaped (scyphate) as minted and possess typically ragged flans. Condition is Very Fine or better and are offered for the incredibly low price of $19.50 each, or three for $52.50. We expect a speedy sell-out, so order promptly to avoid disappointment!

Egyptian Mummy Bead Necklaces



Beads were worn by both men and women in ancient Egypt. Numerous semi-precious stones were available from Egypt's natural resources, but in ancient times the greatest number of beads were made from faience. Faience is an inexpensive ceramic paste that was developed about 4,000 B.C. in Egypt and Mesopotamia. Faience is the forerunner of glass, and although the recipe was a closely guarded secret, the technology spread throughout the ancient world.

During the late dynastic period in Egypt (circa 1085 B.C.) faience beads were produced primarily for funerary use. Eqyptians believed that to insure comfort in the netherworld, the deceased should be surrounded by items from daily life. Quantities of faience beads were buried with the mummy and sometimes they were strung in an intricate manner to fashion a shroud that served as an outer covering for the mummy's linen wrapping.

The Egyptian word Sha () meant luck, and "Sha Sha" became the word for bead, suggesting that beads could bring good luck.

This faience mummy bead necklace is from the 26th dynasty, circa 600 B.C. It has both tube beads and disc beads in many different colors from rich earth tones to the bright blues and greens favored by the Egyptians. This necklace has been restrung and can be worn today for good luck as it was worn 2000 years ago!

Ancient Egyptian Ushabtis

A special offering of beautiful faience ushabtis. Found at Sakara and dating from the Saite period (XXVIth dynasty) circa 664-525 b.c.

The ancient Egyptians believed that in the afterlife they would be summoned to work in the fields. Consequently, they provided themselves with ushabti figures to serve as substitutes to perform these tasks. Every important Egyptian was entombed with three hundred and sixty five ushabtis, one for each day of the year, plus an overseer ushabti for every ten regular ushabtis.

Our ushabtis hold a pick in one hand and a hoe in the other, and bear the inscription "May he be illuminated, The Osiris REDJY-M-HOTEP born of the woman MERYT." Each ushabti is fully intact and will be custom mounted on a clear Lucite stand.

Due to a most fortunate purchase, we can offer these outstanding ushabtis with the most unusual and personal inscription for only $195.00 each. Accompanied by a Certificate of Authenticity with historical background. This is a $350 value!

ONLY **$195** each All are completely intact and in choice condition!

Medieval Hungarian Silver Coins Help Unravel 700 Years of Mystery...Revealing The Family of Jewish Counts Who Placed Their Own Initials (In Hebrew!) On The Official Coins Which They Minted.

These coins are among the most important pieces of Judaic numismatics produced between the end of the Bar Kokhba Revolt in the year 135 and the establishment of the State of Israel in 1948. And they are priced remarkably reasonably at under $100 each!

For many centuries, scholars have sought to solve the mystery of Hebrew letters found on Hungarian silver coins minted under Bela IV (1235-1270) and Stephan V (1270-1272)...concluding that they represent the initials of otherwise unknown Jewish mintmasters.

Thanks to research by Gyula Radoczy, amplified by Daniel Friedberg in his fascinating book "Medieval Jewish Seals from Europe," we now know the full identitiy of these Jewish Counts, who held high positions in the Hungarian government. Due to a very fortunate acquisition, Superior is able to offer a small quantity of Choice Very Fine examples of these 700 year old rarities, minted by father and son - Count Chenok and Count Altman.

Count Chenok is referred to in a document issued by King Bela IV in 1250, as "the Jewish Henel (Chenok) count of the royal chambers (treasury)." Friedberg's research indicated that "for services rendered, Bela granted a Chenok the fortress castle Komorm, 21 villages, and the Tata mill." It is believed that coins were struck with his hebrew initial "chet" (ח) circa 1260.

After Chenok died in 1265, his fortress and mill were given to Queen Maria to settle outstanding debts. His son, Count Altman, then became a lessee of royal mints and struck silver coins with the Hebrew letter "aleph" (א) during the period 1265 to 1272.

Following complaints by Pope Urban IV about non-christian mint lessees, Hungarian King Ladislaus IV (1272-1290) continued to employ Jewish lessees of the royal mints, but forbade them from including Hebrew letters on their coins.

These coins stand as a unique and irrefutable evidence of a brief period of Jewish liberty in an otherwise almost uninterrupted 2000 year history of intolerence and persecution, ranging from the Maccabee's struggle for religious freedom to the Holocaust.

Ira Goldberg, who negotiated for this historic group of coins, indicates that "for all practical purposes these are the only Medieval Jewish coins that can be bought, and once these are sold it is extremely unlikely that a similar opportunity will ever occur." Collectors will surely rank these among the rarest and most interesting items they own.

These Medieval Jewish silver coins are in Choice Very Fine condition and exhibit attractive natural antique cabinet toning.

Scholar Daniel Friedberg aptly summed up: "It is intriguing to think of these unknown men, dead for over 700 years, whose sole stamp in history is a single Hebrew letter."

Ancient Terra Cotta Vessels & Figures

The Phoenicians were traders, and their major cities - Byblos, Tyre, and Sidon - were active mercantile ports from the Twelfth Century B.C. Because of their absolute control of the sea and their shrewd diplomacy, they were able to build a prosperous state, with commercial contacts throughout the Mediterranean.

Little influenced by the cultures with whom they traded, the Phoenicians kept to themselves socially. They maintained their own customs and religious practices apart from neighboring cultures. Phoenician art, however, was the exception, and was greatly influenced by the Greeks and Egyptians, as was their pottery tradition.

Terra Cotta Amphora

◄ **The Amphora** is a classical Greek shape, adopted and widely used by the Phoenicians. This Phoenician amphora is one of many daily use items found in the Holy Land, and dates from 600-300 B.C. It is a miniature copy of a wine amphora, in light brown terra-cotta with a finely smoothed surface, and was intended for household use. It may have contained oil, perfume or spices. Several such ancient terra-cottas were recently made available to us.

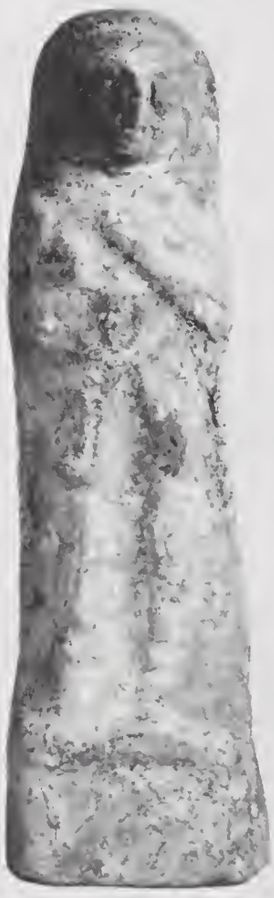
◄ **Holy Land Phoenician, Terra Cotta Amphora,** 7'' with stand, RTF-16 **$200.00.** Order No. 01-119

Holy Land Phoenician Terra Cotta Mother Goddess 5-6'' RTF-13 **$200.00.** ►

Order No. 01-120

Dated to the pre-Christian period of 600-300 B.C. **this Terra Cotta Mother Goddess** was mold cast, hand finished, and kiln fired in a Phoenician workshop of the period. The statue depicts a mother goddess holding a child, but little is known of the significance or purpose of such icons in Phoenician society. There are, however, parallels with statues of the goddess Isis from the 26th Dynasty of Egypt and with a rare Elamite (southwest Iran) bronze of 1200 B.C., depicting a mother figure holding a child.

Each antiquity will be accompanied by a certificate of authenticity.



Terra Cotta Mother Goddess

The First Four Roman Christian Emperors Set

In A.D. 312 Constantine the Great defeated his rival Maxentius at the famous battle of the Milvian bridge. He attributed this great victory to the divine intervention of the Christian God when he saw the sign of the cross in the sky.

This ended the fierce persecution of the Christians, and the Roman Empire became a Christian empire.

This important set of four different genuine Roman bronze coins represents one each of Constantine the Great and his family, including his brother-in-law and two of his sons, all of whom were Roman Emperors.

These coins were in circulation during that momentus period which saw the triumph of Christianity over paganism.

Condition average select VF and the price for all four different is only $59.50 Order No. 01-121

The Miletus Diobol of the Late 6th Century B.C.

Actual size

Miletus is the southern most of the great Greek cities of Ionia in Asia Minor. This city was one of the first cities to issue coins. Miletus was also the leader of the Ionian revolt against the Persians which started in 499 B.C. This was the start of the Greek wars against the Persians which lasted until Alexander conquered Persia in 331 B.C.

Near Miletus was the world famous oracle of Apollo Didymis. The emblems of Apollo were the lion and the sun. These 1/12 silver staters (diobols weighing 1.16 grams) have on the obverse the forepart of a lion with its head turned back and on the reverse a solar symbol in the form of a star.

We have had these coins set into modern 14kt gold earrings. They make a handsome gift at the low price of only . . .

HAND SIGNED BY THE MASTER! Sc 179

The name sends tremors through the art world. One of the giants of 20th century art. The Michaelangelo of his day. Who can say enough about this great artist...Original art by Chagall is beyond the reach of all but a few ultrarich collectors. Each of these covers are hand signed by Marc Chagall and is guaranteed absolutely genuine. This may be your only opportunity to acquire "an original" by the hand of the master.

Persian Miniature Painting & Calligraphy

Persian and Arabic writing were derived from the Aramaic language just before the advent of Islam in the 6th Century and were similar in style when they developed. At first the script was unwieldy and difficult to read and write, but by the 10th Century pronunciation had been developed and the letters were streamlined. As artists began to write in a flowing and rhythmic manner different styles of calligraphy evolved.

Calligraphy has always been an important element in Islamic design and was traditionally used to illustrate the Koran, the Islamic holy book. The Persian script was always the most lyrical and beautiful, and it reached a level of perfection unequaled in other Islamic countries.

Miniature painting originated in the 13th Century at the time of the Il- khanid, when Persian and Chinese styles mingled, and miniature painting began to illustrate texts of all kinds. Perhaps the most important and beautiful style is that of Shahnama, a classical style that combines both painting and calligraphy. Its artistic importance lies in the strength of composition, line, and harmony of color, as well as in the beauty of its calligraphy.
